ANOTHER LINK FORGED. Oronin's Clothes Found Buried in the Sand Near Fifty-Ninth Street-

CHICAGO, May 31.-Dr. Cronin's clothes have been found and another link forged in the chain of evidence that surrounds the murder. The first clue was obtained by the finding of the drawers by Sol Hamburger and Eddie Bresch, two little boys of Lakeview. Louis Hamburger, the 18-year-old brother of the first named lad, then notified the police and, conducting Lieutenant Schuelter to the mouth of the Fifty-ninth street sewer, instituted a search which resulted in the unearthing of the murdered man's pants, coat and undershirt. They were buried over a foot under ground and were only discovered by probing in the sand with sharp sticks shirt bore the name of unfortunate doctor and the other articles were readily recognized other articles were readily recognized as portions of his appared. The paats in places were deeply stained with blood. Strange to say, however, the physician's vest was missing, and in it's place was a vest of much coarser cloth. In the pockets were five pennies and a cigar. This garment presumable belonged to one of the murderers or accomplices. For this readers the relies are making every effort to

murderers or accomplices. For this reason the police are making every effort to suppress the discovery, hoping that Cronin's vest may be discovered in the possession of one of the murderers.

Considerable importance is attached to the fact that when the drawers were first discovered by the little boys a couple of strangers appeared on the spot and ordered them to destroy the more and throw away the mices. the spot and ordered them to destroy the garments and throw away the pieces. This mandate was observed and no more was thought of the matter until the older brother was casually informed of the circumstances. Both those men were

"MACK" GIVES SOME EVIDENCE.

CHICAGG, May 31.—Some valuable information in the Cronin case has been gathered from the man "Mack," alias Alex Williams, who was arrested in a cheap lodging house. Mack claims to be a car-He told the following story: "On the 2nd of May he was working for a Mrs. Wilson on North Ashland avenue, scarcely a block from the Carlson cottage Mack was putting in screen windows at While at work a lady whose name be understood to be Mrs. Dudley, came in and began to talk to Mrs. Wi son. Mack was in the same room and he overheard every word. Mrs. Dudley, who is a stout, fleshy woman, was talking very bitterly against a physician who had attended her hus-hand. Mack says he heard the name "Dr. Cronin" mentioned, but he did not know whether the physician complained of was the Cronin referred to or not. WOMAN'S RIGHT OF DOWER.

LARAMIE, W. T., May 31.—Judge Corn
has rendered an important decision in the
district court at Rawlins, holding that the Edmun's act does not re-establish woman's right of dower in any territory woman's right of dower in any territory except Utah. Mrs. Amanda W. France sued for dower in all the realty now in the hands of assignees which formerly belonged to her late husband, Jos. France. The action was brought under the section of the Edmunds act, which provides that "a widow shall be endowed of one-third part of all lands whereof the husband was seized of an estate of inheritance at any time during their marriage, unless she shall have lawfully released her right thereto."

right thereto."

The legislature of 1876 abolished the right of dower of Wyoming, which before that time existed under the common law. It was claimed by the attorneys for Mrs. France that the Edmunds act revived this France that the Edmunds act revived this right in all the territories, and rendered null any repealing statute. Defendants held that the particular section of the act quoted above applied to Utah alone, and they were sustained by the court. A long decision was rendered, in which the construction of the act was carefully analyzed by Judge Corn. This is the first time that a legal decision on this question has ever been rendered.

RETICENT ON FOREIGN AFFAIRS. Government Officials Decline to Talk of Samoa or Behring Sea.

WASHINGTON, May 31.—State department officials absolutely decline to discuss the Samoan conference or the Behring se matter. Of the former they admit that the expection of a speedy conclusion of the conference, the comparatively unimortant details only remaining to be adjusted. But upon the provisions of a treaty, if a treaty has yet been drawn, they efuse to talk further than to say the public must receive its information re specting treaties in the usual course efter action upon them by the United States senate, to which body all United States senate, to which body all treaties must be submitted for approval before they become public. The reason for this lies in the fact that important amendments are often made by the senate after treaties have been arranged by the diplomatic officers of the treaty power. So radical are these changes in fact that they have caused the fracture of pending treaties, a notable instance occurring in the last congress.

So far as can be learned there is no new phase in the Behring sea matter. The president's proclamation appears to have closed the history of the case and it can not closed the history of the case and it can not be that there has been any correspondence between the government of the United States and Great Britain on the subject, According to the position taken by the United States government by congres-sional declaration the jurisdiction of the United States over the waters of the Alaskan side of Behring sea is not ad-mitted to be a subject for negotiations. The word partridge, for example means one bird in New England and another at the south, and the significance of even so common a term as toast appears to be subject to wide fluctuations. On the second day out from Fort Smith, says Col. Marcy, we halted for the night at a respectable looking farm house, and my New York companion readily obtained from the hostess a promise to make a nice dish of toast and a cup of tea.

In due course supper was announced, and we seated ourselves at the table. The dishes before us consisted of fried bacon floating in grease, some corn Afternoon game postponed on account bread in the shape of hand grenades, and a quantity of glutinous, half baked hot biscuit, neither of which seemed calculated to tempt the appetite of the gentleman from New York, who called for the

well its value, thought some of your readers would be glad to know. Take one-half cake, of soap, cut into small pieces and dissolve thoroughly in hot water. Pour this into enough cold water to cover the blankets, add two ounces of borax (pulverized dissolves most readily) and put your blankets in to soak all night, or longer. In the morning take out and squeeze most of the water out. and rinse thoroughly in cold water in which a little borax has been dissolved. Put them through a second rinsing water and then the bluing water. Do not wring or squeeze them this time, but hang them up to drain and dry. The easiest way is to take them out under the line in the tub in the last water. Hang single on the line, and take a sunny day. Effect of Minerals on Plant Growth From some recent experiments by Mr. Henri Jumelle in cultivating lupines in distilled water and in a mineral solution. it appears that the presence of mineral substances in the plant is accompanied with a greater production of parenchyma and a formation to a less degree of sustaining elements. Moreover, if has been given the vacant position. The following commissions have been issued: Charles A. Grimes, of Wichita, second lieutenant section A. battery A; H. L. Stoddard, of Eureka, captain of compeny H, Third regiment; Alexander Welch, first lieutenant of same company. the plants submitted to the experiment be dried, it is observed that, in a general way, the stalk and leaves of the plant provided with salts contain a larger proportion of water at this period than do these same organs in plants deprived of salta

Upon the whole, the absence of salts notably modifies the structure of a plant, but the modifications seem to be due, in great part, less to the absence of salts than to the diminution of the constituent water that results therefrom .- Scientific
